

HSS Spectrum — Floquet Exponents (HmqNEig) - \$a = 0.80\$

$$a = 0.8, q = 0.01, \delta = 0.00$$

Exp de floquet et Multiplicateurs

$$\lambda_1 = 1.000e^{j-2.810j} \text{ et } \mu_1 = 0.000 + -0.895j,$$

$$\lambda_2 = 1.000e^{j2.810j} \text{ et } \mu_2 = 0.000 + 0.895j$$

$$\Pi\lambda_i = 1.000e^{j0.000j} \text{ and } \Sigma\mu_i = 0.000 + 0.000j$$

$$a = 0.8, q = 0.01, \delta = 0.25$$

Exp de floquet et Multiplicateurs

$$\lambda_1 = 0.675e^{j2.783j} \text{ et } \mu_1 = -0.125 + 0.886j,$$

$$\lambda_2 = 0.675e^{j-2.783j} \text{ et } \mu_2 = -0.125 + -0.886j$$

$$\Pi\lambda_i = 0.456e^{j-0.000j} \text{ and } \Sigma\mu_i = -0.250 + -0.000j$$

$$a = 0.8, q = 0.01, \delta = 0.40$$

Exp de floquet et Multiplicateurs

$$\lambda_1 = 0.533e^{j-2.739j} \text{ et } \mu_1 = -0.200 + -0.872j,$$

$$\lambda_2 = 0.533e^{j2.739j} \text{ et } \mu_2 = -0.200 + 0.872j$$

$$\Pi\lambda_i = 0.285e^{j0.000j} \text{ and } \Sigma\mu_i = -0.400 + 0.000j$$

$$a = 0.8, q = 0.31, \delta = 0.00$$

Exp de floquet et Multiplicateurs

$$\lambda_1 = 0.662e^{j3.142j} \text{ et } \mu_1 = -0.131 + 1.000j,$$

$$\lambda_2 = 1.511e^{j3.142j} \text{ et } \mu_2 = 0.131 + 1.000j$$

$$\Pi\lambda_i = 1.000e^{j-0.000j} \text{ and } \Sigma\mu_i = -0.000 + 2.000j$$

$$a = 0.8, q = 0.31, \delta = 0.25$$

Exp de floquet et Multiplicateurs

$$\lambda_1 = 0.455e^{j3.142j} \text{ et } \mu_1 = -0.250 + 1.000j,$$

$$\lambda_2 = 1.002e^{j-3.142j} \text{ et } \mu_2 = 0.000 + -1.000j$$

$$\Pi\lambda_i = 0.456e^{j0.000j} \text{ and } \Sigma\mu_i = -0.250 + 0.000j$$

$$a = 0.8, q = 0.31, \delta = 0.40$$

Exp de floquet et Multiplicateurs

$$\lambda_1 = 0.373e^{j-3.142j} \text{ et } \mu_1 = -0.314 + -1.000j,$$

$$\lambda_2 = 0.764e^{j-3.142j} \text{ et } \mu_2 = -0.086 + -1.000j$$

$$\Pi\lambda_i = 0.285e^{j0.000j} \text{ and } \Sigma\mu_i = -0.400 + -2.000j$$
